Postgres Weekly

Issue 214 — July 5, 2017

Analyzing Ethereum, Bitcoin, and 1200+ Cryptocurrencies

Cryptocurrencies are fuelling a modern day gold rush. How can we use Postgres and some SQL to better understand this evolving market?

TIMESCALE

How to Use Ansible to Manage Postgres

Ansible, an open source automation tool, can make complex configuration and management tasks in Postgres simple.

OPENSOURCE

Postgres-XL: MPP and Horizontally Scalable PostgreSQL from 2ndQuadrant

Postgres-XL is a massively parallel database built on top of and very closely compatible with PostgreSQL 9.5. It is flexible enough to handle OLAP & OLTP workloads and is Horizontally Scalable with all the features of PostgreSQL.

2NDQUADRANT POSTGRESQL PRODUCTS **#SPONSORED**

Announcing PGConf Austin 2017 — Call for Papers Open

It's being held November 3-4 and the CFP is open till August 20.

JOSHUA DRAKE **#NEWS**

Uptown Func: Uses for Postgres Functions

"creating a set-returning function in Postgres is almost frighteningly trivial when compared to other database engines"

SHAUN THOMAS

Efficient Rollup Tables with HyperLogLog

Part two of a [series](#), this one looks at how HyperLogLog can be combined in various ways to give you more efficient rollups for dashboards and metrics.

CITUSDATA

Postgres and the Calendar

Working with calendars can be surprisingly frustrating from various formats to dealing with the nuance of leap years. Postgres yet again can do much of the hard work for you as shown here.

DIMITRI FONTAINE

Migrating Oracle Databases to Postgres on Amazon RDS

See how to migrate to PostgreSQL on RDS in three steps
