[READ ON THE WEB](#)

Postgres Weekly

PostgreSQL Anonymizer: A Tool to Mask Personal Information — An introduction to a new Postgres extension for masking or replacing personally identifiable information (PII) which may be necessary for protecting commercially sensitive data or for complying with regulations like GDPR.

DAMIEN CLOCHARD

The Biggest Mistake Postgres Ever Made — A brief piece on confusion over the name of our favorite database, which some people call PostgreSQL, some Postgres, and some even *Postgre*.

CRAIG KERSTIENS

Because Your Data Is Your Business — PostgreSQL Experts provides full-stack support for PostgreSQL, including database tuning, emergency support, and remote DBA services, including 24x7 support.

POSTGRESQL EXPERTS, INC. SPONSOR

A 3 Part Series on Postgres Locking — An understanding of PostgreSQL locking is important to build scalable applications and avoid downtime. This series covers row locks, [table-level locks](#) and [lightweight locks](#).

NICKOLAY IHALAINEN

PipelineDB 1.0: An Extension for High-Perf Time-Series Aggregation — A Postgres extension for high-performance time-series aggregation via continuous SQL queries.

DEREK NELSON

Postgres 12 To Introduce a `pg_promote` Function — With this new SQL-callable function, you'll be able to promote a standby.

HUBERT DEPEZ LUBACZEWSKI

The Evolution of Partitioning from Postgres 9.6 to 11 — Postgres partitioning first landed in 9.6. It has continued to get updates and now with newly released Postgres 11 is feature rich.

DAVID ROWLEY (2NDQUADRANT)

How to Set up scram-sha-256 Authentication in Postgres

QUINN WEAVER

Recreating a Column Oriented Database in Postgres — This is *rather niche*, but you may find this experiment in making Postgres act more like a column oriented DB interesting.

BRIAN DAMS

Peeking at the Query Performance of Postgres 11

KAAREL MOPPEL

Announcing: EDB Postgres Migration Portal Beta 3 Release

ENTERPRISEDB **SPONSOR**

pgenv Gets Patching Support — **pgenv** is a utility to build and run different releases of Postgres and now supports customizable patching.

LUCAFERRARI

□ **EVENTS**
