Postgres Weekly

Issue 87

January 7, 2015

[pgcli - An Enhanced Postgres CLI](#)

Want psql on steroids? Here it is. While it's a Python package, it should still be easy to get setup even if you're not a Python developer. It features auto-completion, syntax highlighting, and more.

[AMJITH RAMANUJAM](#)

[PostgREST: A REST API for Any Postgres Database](#)

Want an out of the box REST API on top of your Postgres database? Here's the tool for it. You can take a test drive with [this demo](#).

[JOE NELSON](#)

[An Update on Parallelism in Postgres](#)

[ROBERT HAAS](#)

[A New Way to Measure Business Impact](#)

As application complexity increases, it's important to keep a focus on what really matters to your business - your application revenue. With AppDynamics, you get 100% visibility into application revenue in real time so you can now be more effective in how you identify, isolate, and resolve application issues that affect the business. [Get started with AppDynamics](#).

[APPDYNAMICS](#) **SPONSORED**

[Building a College Basketball Database — Part 1: Scraping ESPN](#)

Want an excuse to scrape some data and work on a fun side project with Postgres? Here's the first of a few posts that show scraping college basketball data and storing it within your favorite relational DB.

[PATRICK HOWELL](#)

[PostgreSQL: Documentation: 9.4: JSON Types](#)

9.4 was released just before the holidays with one of the biggest features being the new JSONB datatype. If you haven't already explored JSONB, take a look at the docs and see what's newly available.

[POSTGRESQL.ORG](#)

[SQL Is Your Friend, Part 1](#)

Want a list of reasons to fall in love with Postgres all over again? Here's the first of a great multi-part series highlighting the JSON datatype and the flexibility it brings.

[BARRETT CLARK](#)

[SQL Is Your Friend, Part 2](#)

In part two of the series this post looks at something that will make you appear like an absolute badass to most others if you're able to master it - window functions. The applications are rare but powerful, such as month over month growth, ranking within sub-groups, and more.

[Announcing que-go: a Go port of the Ruby Que job queue for Postgres](#)

Want to have a queue that just works for your particular language with Postgres without trying to work with any and all backends? Here's your answer with a port of the Ruby Que job queue for GoLang.
