## Postgres Weekly

Issue 194 — February 15, 2017

## PostgreSQL 9.6.2, 9.5.6, 9.4.11, 9.3.16 and 9.2.20 Released

This group release includes fixes that prevent data corruption issues in index builds and in write-ahead-log replay situations, and patches over 75 other reported bugs.

POSTGRESQL

## Is PostgreSQL Good Enough?

Can Postgres be 'good enough' for all sorts of different use cases? Time series, object stores, pubsub, realtime, and more are covered here.

RENE DUDFIELD

## Postgres Worst Practices (A Slidedeck)

Each slide here describes a "really bad way people can screw up their PostgreSQL database".

ILYA KOSMODEMIANSKY

## 24/7 PostgreSQL support with guaranteed response & resolution times

□□When it's critical, you can count on us! A Platinum service plan with 2ndQuadrant is all the insurance you need for when things don't go according to plan. Giving you a quick database recovery, with as little downtime as possible.
