## Postgres Weekly

Issue 115 — July 22, 2015

## ZomboDB: Postgres Extension For Elasticsearch-Backed Indexes

An extension that enables efficient full-text searching via the use of indexes backed by Elasticsearch. In order to achieve this, ZomboDB implements Postgres' Access Method API.

ZOMBODB [#CODE](#)

## pgBadger: A PostgreSQL Log Analyzer

A PostgreSQL log analyzer built for speed with fully detailed reports from your PostgreSQL log file. It's a single small Perl script.

## Optimize Postgres Performance with Summer Training Classes

[Tuning and Maintenance](#) (1 day) teaches practical ways to optimize the performance of a PostgreSQL server. With [Foundations of Postgres Administration](#) (3 days) you learn the essential details for successful Postgres administration. Both are offered on-line with a live instructor, or in an [on-demand format](#).

## Selectively Firing Postgres Triggers

Triggers can be useful to fire off updates or cascading changes at times, but there's cases where you may want to explicitly opt out of them running. Here's your guide on how, and more on when this may be useful.

GREG SABINO MULLANE

## Migrating to JSON in PostgreSQL

If you've had your data for some time in Postgres it's probably nicely normalized in tables, but what if you want to get it into the new JSON datatype for flexibility? Here's your guide on going from columns to JSON.

JÖRG RATHLEV

## Waiting for 9.6: Add psql \ev and \sv Commands for Editing and Showing View Definitions

OK, Postgres 9.5 hasn't landed yet, but patches ready for 9.6 are already landing. While it's a relatively minor usability improvement, for viewing details around views and editing them, this should prove handy.
