Postgres Weekly

Issue 213 — June 28, 2017

Introducing Dexter: An Automatic Indexer for Postgres

By monitoring queries, this tool will generate queries to improve their performance.

ANDREW KANE

Partitioning Existing Tables in Postgres

Options for partitioning existing production Postgres tables, and trade-offs to consider.

IGOR STOJKOVIC

Mitigate Risk. Evaluate BEFORE you Migrate with a 2ndQuadrant Migration Assessment.

Get an upfront evaluation of what will be required for a smooth migration without loss of data, unplanned downtime or unexpected expenses. A PostgreSQL Migration Assessment can help mitigate risk, identify blockers, & estimate effort and cost.

2NDQUADRANT POSTGRES SQL SERVICES **#SPONSORED**

A Look at Postgres's LATERAL JOIN

PostgreSQL 9.3 introduced a new kind of join that can run a subquery over each result from another table or subquery.

KRZYSZTOF KEMPIŃSKI

Building SQL Queries for Funnel Analysis

How Statsbot constructs SQL queries for conversion funnel analysis.

NURZHAN OSPANOV

Postgres 10 Beta vs Postgres 9.6 Analytics Performance

How does the latest version of Postgres, still in beta, fare performance-wise?

KAAREL MOPPEL **#OPINION**

PgBackupMan 1.2.0: A Tool for Logical Backup Management

A tool for managing PostgreSQL logical backups created with pg_dump and pg_dumpall.

RAFAEL MARTINEZ GUERRERO **#TOOLS**

PostgreSQL in a Time of Kubernetes

Zalando has released an [operator tool](#) to help manage Postgres clusters in Kubernetes.

ZALANDO **#TOOLS**

Real-time Postgres performance monitoring

Graph and correlate 50+ Postgres metrics with data from the rest of your infrastructure & apps. 14-day free trial.

DATADOG **#SPONSORED**

pg-amqp-bridge: Send Messages to RabbitMQ from Postgres

Put a row into a table and get a message sent to RabbitMQ. Ideal for more decoupling in your apps.

SUBZERO **#CODE**

pREST: Serve a RESTful API from any Postgres Database

Written in Go.

NUVEO **#CODE**
