## Postgres Weekly

**Issue 52**

April 3, 2014

Did you know Postgres Weekly is now just over a year old? :-) As always, a big thanks goes to [Craig Kerstiens](#) for continuing to find great stuff to share.

### [Creating PostgreSQL Arrays Without A Quadratic Blowup](#)

Arrays are very useful in Postgres, but depending on how you're working with them they can have significant performance costs. Here's one example of using arrays and a specific way to alter the usage to make them more efficient.

[HEAP](#)

### [Subtly Bad Things Linux May Be Doing To PostgreSQL](#)

[ROBERT HAAS](#)

### [Postgres 9.4 Feature Highlight: Triggers On Foreign Tables](#)

Last week we had plenty of articles highlighting jsonb, which recently made it into Postgres 9.4. Still there's other great features such as some improvements to foreign tables that are worth catching up on as well.
