[A Simple Implementation of a 'History' Table using the Hstore Extension](#)

Lots of applications want history for their applications, and for as many times as it's been desired implementing it is still often left up to you. Here's a great post on how it can more easily be done with hstore.

PAVEL STĚHULE

[A New Way to Measure Business Impact](#)

As application complexity increases, it's important to keep a focus on what really matters to your business - your application revenue. With AppDynamics, you get 100% visibility into application revenue in real time so you can now be more effective in how you identify, isolate, and resolve application issues that affect the business. [Get started with AppDynamics.](#)

[New Release: Pgloader 3.2](#)

The 'COPY' statement is a powerful way to load data into Postgres, but it's more like a chainsaw than a surgeon's scalpel. Pgloader is a tool that's meant to help with the process of loading data from other sources into Postgres with better support/error handling.

[Postgres 9.5 Feature Highlight: New WAL Format](#)

Under the covers the Write-Ahead-Log or WAL is key to how Postgres reliably keeps your data. An update to the WAL for 9.5 is going to allow some even more powerful functionality to be built on it.
