## Postgres Weekly

Issue 158 — May 25, 2016

### Creating Activity Feeds in PostgreSQL 9.5

A look at how to create modern activity feeds with Facebook-like grouping using only Postgres.

PIOTR OKONSKI [#TUTORIAL](#)

### Postgres & Redis Sitting In a Tree

"Typically a company may start with a relational database like Postgres and add Redis for more high velocity use-cases. What if you could tie the two together to enable so much more?"

RIMAS SILKAITIS

### Changing PostgreSQL Version Numbering

The PostgreSQL Project is contemplating a change to how they do version numbers.

JOSH BERKUS [#NEWS](#)

### EDB Replication Server - 1st production-ready logical replication for PostgreSQL

First and only production-ready multi-master replication product to feature new technology developed for PostgreSQL - increasing performance of transactional workloads requiring replication by extracting changes via Write-Ahead Log (WAL) files and reduces latency during replication.

ENTERPRISEDB [#SPONSORED](#)

### Creating Pivot Tables in PostgreSQL Using The Crosstab Function

The 'tablefunc' extension provides a really interesting set of functions. One of them is the crosstab function, used for pivot table creation. That's what this article covers.
