Auditing Data Modifications In Postgres

Your data is always important, but in some cases you want extra auditing. Here's a great initial dive into how to set it up and what impacts it may have on your DB.

JSON in PostgreSQL

As 9.4 gets closer and closer everyone is awaiting JSONB. Of course JSON is already available, but if you're unfamiliar here's your start. And the slides continue on into a comparison between the two formats.

PostgreSQL Offsets and Pagination Performance

Postgres can have some trouble performing well with high offsets on queries. Cursors can be a solution but have their own flaws. Alex MacCaw looks at another approach.

Mastering the Postgres Rollout - Follow the Yellow Brick Road?

That famous journey began simply, but quickly entered some challenging territory. For DBAs on the road to building more sophisticated environments to support their new Postgres deployments, the same may be true. High availability, replication and performance tuning can present bumps in the road, but here are some ideas on how to approach with caution.
