Total Security in A PostgreSQL Database

Theres probably no place you should care about security more than when it comes to your data. Here's a great thorough read about many of the things to consider from roles to which languages you run in your database.
IBM DEVELOPERWORKS

Some Basic PostgreSQL Orchestration from bash

If you actively develop with Postgres locally here's a few scripts that may make your life easier.
PAVEL STEHULE

Colorizing The psql Prompt — A Guide

Building on an earlier post on taking advantage of psql, this digs much deeper into how you can customize various colors within it. A must for anyone that customizes their shells.
JOHN GRABER

A Kickstarter for Improved PostgreSQL Support in Django

If you're a Django and Postgres user consider backing this Kickstarter by a Django core developer to build a PostgreSQL specific backend for Django, taking advantage of a lot of awesome features such as hstore and range types.
KICKSTARTER

Generate man and html with asciidoc in a Postgres extension

Here's a pretty sweet example for those looking to write extensions where it can automatically build docs to make it even more friendly for end users.
MICHAEL PAQUIER
