Postgres Weekly

Postgres Weekly

Three Database Modelling Anti-Patterns — Looking into some classic anti-patterns: entity attribute values, multiple values in a single column, and how using UUIDs can be an anti-pattern too.
DIMITRI FONTAINE

Postgres, The Most Loved RDBMS — StackOverflow's 2018 survey results are out. Postgres is the 'most loved' *relational* database (though Redis pips it).
SIMON RIGGS

Real-Time Postgres Performance Monitoring — Collect out-of-the-box and custom Postgres metrics and correlate them with data from across your distributed infrastructure and applications. Gain real-time performance insights and set intelligent alerts with Datadog. Try it free.
DATADOG `SPONSOR`

Migrating Production from MariaDB Galera to Postgres and Patroni — A thorough explanation of a major migration from MariaDB using Galera, a multi-master clustering system, to Postgres using the Patroni high-availability toolkit.
RAPHAEL MICHEL.

What Full-Text-Search Has to Do with VACUUM — You might think they're very separate topics but this post demonstrates how vacuuming can affect the performance of GIN indexes used by FTS.
HANS-JÜRGEN SCHÖNIG

Patching Plain Postgres for Parallel PostGIS Plans — Stock Postgres 10 with PostGIS 2.4 doesn't parallelize spatial queries well but it's possible to improve things with some tinkering.
PAUL RAMSEY

Creating a Data Redaction Capability to Meet GDPR Requirements — The *General Data Protection Regulation* is a new EU law for data protection.
MARC LINSTER AND RENEE DEGER
