PG Casts: Postgres Screencasts

While we feature a lot of blog posts in Postgres Weekly, screencasts are more rare. If video is your preferred way of learning, this new collection may be just the thing.

Timestamps and Time Zones in PostgreSQL

Working with timestamps is often incredibly painful, often due to a mix of misunderstanding and other times due to lack of right tooling. This in depth post sets a good context and shows you the two options and when each makes sense in Postgres.

Faceted Search in the Single PostgreSQL Query

If you have the need for faceted search in Postgres there's a number of ways to implement it, this approach uses more of the modern functionality of Postgres: JSONB and GIN Indexes, and throws in full-text search for good measure.

BRIN Indexes in PostgreSQL: Correlation, correlation, correlation

BRIN indexes have been introduced in PostgreSQL 9.5. While BRIN indexes are definitely a win, people tend to exagerate and use them ways too frequently, take a look at when they're actually most helpful here.
