Postgres Weekly

READ ON THE WEB

Postgres Weekly

```
create table js(id serial primary key, extra json);
insert into js(extra)
    values ('[1, 2, 3, 4]'),
           ('[2, 3, 5, 8]'),
           ('{"key": "value"}');
```

Postgres Data Types: JSON (and XML) — The latest in a fantastic series digging into Postgres' support for various types of data. This week it's JSON, and XML has been covered too.
DIMITRI FONTAINE
